

INDEPENDENT ENERGY **SOLUTIONS** CORP.

W1- Watchmen

Introduction

The W1 - Wireless Environment Monitor is an industry leading real time monitoring system designed to detect changes in ambient environmental conditions. The system can accept multiple environmental sensors (i.e. toxic gases, wind speed, wind direction, particulate, noise monitoring, and water quality)

Benefits & Feature

- Solar powered wireless environmental monitor
- Detects change in ambient environmental conditions
- Various sensors (H₂S, SO₂, LEL, No_x, VOC, Etc....)
- Visual anemometer (wind speed / wind direction sensor)
- Compact size
- Web enabled
- Analog & Digital inputs

Ultralow level toxic sensors available: H₂S, SO₂, NO, & NO_x
